### 1. Purpose of this document

In this document we'll explain how you can manage account access and managing the settings of our account. The basics.

This guide is only intended for the account responsible(s). Within Easy to Inspect this are users with the role 'System Admin'.

### 2. Sign up for a trial account

When you click on "start now, 30 days for free", you can sign up for a trial account. This trial account gives you access to all standard features of Easy to Inspect for 30 days. You can, with 4 other users try out the benefits of Easy to Inspect. Additionally, also 10 other users can be linked to your account who can take action if deviations are detected during inspections. After 30 days your account will expire automatically.

Our sign-up page will open and you need to complete your details. All mandatory fields are marked.

### Try out during 30 days for free, without any obligations

With our trial account, you can experience all features of Easy to Inspect. Invite 4 other colleagues to join you and work together to find out all benefits. Use our help guides to start quickly. Your trial account will be closed after 30 days automatically.

Pay attention! We will send the inspection reports automatically by email. Therefore, please use a working e-mail address.

With the same credentials: Email and password, you can logon to the inspection app on your mobile device.

### 3. Your (trial) subscription

You can find your account details in the menu bar at the left of the 'menu' when you're logged on at Easy to Inspect.

If you don't see that menu item in the settings menu, you're not the administrator of the account.

Select "My subscription" to check your current status.

In case of a trial account, it will display such.

In case of trial accounts, additional features are not available. When you change your account during the trial, and add additional features, we immediately start invoicing.

Easy to Inspect check, report analyse

We always provide an overview with a summary of your billing information. Rates are displayed as annual rates. The amount invoices will be the calculated to the end of the current subscription period. So, if you account is only valid for another 8 months, the additional service will be calculated for the remaining subscription period of 8 months.

After selecting you subscription changes, select continue to update your billing information.

In the tab history you can see an overview of all historical changes made to your subscription.

### 6. Automatic renewal

### Your trial account will automatically expire.

Once you choose to continue using Easy to Inspect with a paid subscription, your subscription will be renewed automatically. You can undo this, by deselecting your auto renewal.

Select menu, my subscription, select change subscription, deselect auto renewal.

| Set the start date of the subscription     Date start     16-01-2025     28-02-2026     Auto renew my subscription     Start   Set the start date of the subscription     16-01-2025   Date end     16-01-2025     Date end     16-01-2025     28-02-2026     Auto renew my subscription today     Date end     16-01-2025     28-02-2026     Auto renew my subscription | Start                                  | Start my subscription    | today      |  |

|  |  |                          |            |  |

Such change can also be made via the 'My company' menu (see chapter 7).

# 7. Changing / adding company information

Your company details can be viewed via the main menu, selection 'My company'. You can find the settings option in the left down corner of the blue bar.

| <b>(බූ</b> Set | tings           |
|----------------|-----------------|
| ¢              | My checklists   |
| <u></u>        | My company      |
| ß              | My subscription |
| 80             | My users        |
| ~~~~           | My groups       |

Once you selected 'My company', your organisation details will be displayed.

Now, you can:

**User** guide

- Change automatically renewal of your subscription
- Enter alternative billing address information
- Provide information about primary contact persons
- Customise the logo and company name displayed in the App and the inspection reports.
- Enable 2 Factor authentication for all users

### **Please note!**

The information you include in this menu is used to make your invoices when you continue working with Easy to Inspect after the trial period. If the information is wrong, your invoice will be wrong. Since this is an automatic process, we cannot issue new invoices.

If your company is based in the European Union, please provide your VAT number to apply for a VAT deduction. An automatic VAT number check applies, only valid numbers are accepted.

### 9. 2 Factor Authentication

As system administrator, you can require that all users must use 2 factor authentication when working on Easy to Inspect.

2-FA is not required when working in the App or uploading inspection results.

2-FA only applies to our webbased environment.

If you decide to make 2-FA not mandatory, users can always decide themselves to use 2-FA. As a default setting such is not mandatory. We recommend that you require the use of 2-FA.

You can do so via the settings menu, option My Company, scroll down to Advanced settings and save your settings.

### Advanced settings

Configure advanced settings such as: 2-factor authentication, API access, filter based email and high quality PDF report by email 2-factor authentication

Enable 2-factor authentication for all users in this account

Once, the user has configured the 2-FA, the user must enter the code every time when the user logs on at the website of Easy to Inspect.

| Sign in   | to your account                           |
|-----------|---|
| Open your | authentication app and enter the code for |
|           | pett. House logging in: contact us:       |
|           | Sign in                                   |

### **10.** Link users to your account

When you would like to link a user to your account, you go to the main menu, select settings and then you select My users.

**Note:** only the users with the role 'system administrator' have this option. Other users will not see the 'settings' menu. There must always be one user with this role. Easy to Inspect will automatically prevent that the last user with this role will be de-activated.

| <b>{ộ}</b> Set | tings           |  |
|----------------|-----------------|--|
| ¢              | My checklists   |  |
| <u></u>        | My company      |  |
| ß              | My subscription |  |
| ŝ              | My users        |  |
| 6              | My groups       |  |

**Jser** guide

When you select My users, a screen will open that displays all users within your account.

This screen provides information about:

- The number of assigned / available normal users (users with inspection rights).
- The number of assigned / available action only users (users who can only take actions on nonconformities resulting from inspections.

If you would like to link a member of your organisation to your account, select 'New user' in the left hand side menu bar.

| Other settings   |   |   |
| The user type of this user and the preferred language of the user.   | User type Select user type                          | 0 |
|  | Language  |   |
|  | Dutch   | ~ |
|  |   |   |
| Security settings  | Password  |   |
| Password and 2-factor setting  |   | 0 |
|  | Password confirmation                               |   |
|  |   | 0 |
|  | Require 2-factor authentication (2FA) for this user |   |

You must select if the user is an inspector (normal user) or an action only user. Furthermore, you must define the roles the users will have. (see our help guide on user rights).

Note: The user can change the password himself afterwards.

In case the company settings are such that 2-FA is required for all users (see chapter 9), the tick box will not influence the settings.

Once finished, the user is linked to the account.

You can see the number of users that are linked to your account.

In case 2-FA is applicable, this is displayed with a lock. For new users, the lock is still open since the user must establish the final steps of the 2-factor authentication him/herself.

### 11. De-linking users from your account

It is not possible to delete users that are known in your account. If you would delete a user, all inspection reports or action reports would be impacted. You can however de-activate a user.

Select 'setttings' in the main menu, select my users, select that action button of the user.

It is not possible to delete users that are known in your account. We know examples that users were transferred from one Easy to Inspect account to another. This is not possible when users are known under the same email address.

Since users, and their inspection reports, can not be removed, they can only be de-activated and / or changed.

For instance; you can change the user settings such, that the email address is modified and no longer working.

### Example:

**User** guide

<u>User1@easytoinspect.com</u> must not only be inactivated, but this user must be linked to another Easy to Inspect account.

You must now change the user settings:

- Change the email address into user1(expired)@easytoinspect.com
- Inactive the user.

Now you can link the <u>user1@easytoinspect.comm</u> to another account.
